

DELI VOLTAGE TESTER PEN

Electrician's Choice | High-Brightness LED | Battery-Free Design

1. Product Overview

Anti-False Touch & High-Definition Display. Designed for maximum safety and ease of use. This is a home and industrial essential that eliminates electrical hazards with accurate readings.

2. Core Advantages & Technology

High-Brightness LED

Dual-sided illumination that far surpasses traditional neon testers. Highly sensitive and immediately identifiable.

Live / Neutral Wire Detection

Safe and precise. The orange LED illuminates brightly upon contacting a live wire, and remains off for neutral wires.

3. Premium Build & Sizing

Constructed with a **40Cr Alloy Steel Shaft** (Slotted Bit) for extreme wear resistance and hardness. The **High-Transparency AS Body** is insulated, drop-resistant, and won't discolor over time.

Available in 3 lengths: 123mm / 140mm / 190mm to suit all application ranges.
